

Jacob Helwig

jacob.a.helwig@gmail.com · jacobhelwig.github.io

Education

Texas A&M University, Ph.D. Computer Science

August 2021-May 2026

The University of Texas at Austin, BS Mathematics

August 2016-May 2021

Work Experience

LinkedIn, CoreAI Intern

Summer 2024, Summer 2025

- **Summer 2025:** Pretrained transformers for sequential recommendation. Key challenges include correct weight and optimizer state updates with sparse gradients as a result of high percentage of unused embeddings due to large item cardinality/vocab size.
- **Summer 2024:** Developed full pipeline for large-scale training of causal transformers for sequential recommendation. Key challenges include memory management due to large cardinality/vocab size leading to large model head and logits vector. Solved using kernel fusion of model head with cross-entropy loss.

Los Alamos National Laboratory, Applied ML Fellow

Summer 2023

- Project: Solving the Elastic Wave Equation Using Deep Learning

OSS Contributions

verl, Volcano Engine Reinforcement Learning for LLMs ([All Merged PRs](#))

- [On-Policy Distillation](#)
- [Multi-Teacher On-Policy Distillation](#)

Publications and Talks

[Preprint]	Data-Efficient Autoregressive-to-Diffusion Language Models via On-Policy Distillation Co-first author
[ICML 2026]	Learnability-Informed Fine-Tuning of Diffusion Language Models Paper
[ICLR 2026]	A Two-Phase Deep Learning Framework for Adaptive Time-Stepping in High-Speed Flow Modeling First author, paper , code
[NeurIPS 2024]	A Geometry-Aware Message Passing Neural Network for Modeling Aerodynamics over Airfoils (talk at the NeurIPS 2024 ML4CFD Competition) Best student solution, paper , code
[ICML 2024]	Equivariance via Minimal Frame Averaging for More Symmetries and Efficiency Spotlight, paper
[FnT ML]	Artificial Intelligence for Science in Quantum, Atomistic, and Continuum Systems Co-first author, paper
[ICLR 2024]	SineNet: Learning Temporal Dynamics in Time-Dependent PDEs Co-first author, paper , code
[LoG 2023]	High-fidelity Fluid Flow Reconstruction Paper
[ICML 2023]	Group Equivariant Fourier Neural Operators for Partial Differential Equations Co-first author, paper , code
[ACM TOMS]	A Covariate-Dependent Approach to Gaussian Graphical Modeling in R First author, paper , R package
[Preprint]	An Approximate Bayesian Approach to Covariate-dependent Graphical Modeling Paper

Honors

Ruth J. & Howard F. Newton Memorial Graduate Student Teaching Award In Statistics, 2022 Recipient

- “Jacob was selected to receive the Newton Teaching Award based on his outstanding evaluations by the instructors he was Teaching Assistant for during the Fall 2021 and Spring 2022 semesters.” ([award details](#))
